

Second Level Password Guide

Eclipse Trading Terminal

Version: 1.0.66
Date: 22/02/2018
Revision: 1

Step 1:

After entering correct user id and password second level authentication screen will appear. If user is logging for the very first time a "generate password" button will enable to generate second level password for the user.

Step 2:

If the user has already generated second level password then this generate password button will not appear.

After clicking generate password button an email will be sent to the user with his/her second level password and email template will look like as under:

Brokrage Company
Online Second Level Password

Request Date: 22-Feb-2018
Request Time: 11:26:00 AM

Dear RMS01,

As per your request Second Level password has been generated. To login in please use: **UTX4MY**

Thanks,
Brokrage Company

After successful login user is provided with the facility to change its second level password.

Upon clicking change second level password a new screen will appear which prompt user some necessary information to change his/her second level password.

The screenshot shows a dialog box titled "Change Second Level Password". At the top, there is a red error icon and the text "Please enter old second level password". Below this, there are three input fields: "Old Second Level Password:", "New Second Level Password:", and "Confirm New Second Level Password:". At the bottom of the dialog, there are two buttons: "Submit" and "Cancel".

If there is not authenticated email address available in database for the user and user try to generate his/her second level password an Error message will be shown to the user.
